REPAIR FIRST APPROACH

A large number of roofing problems can be repaired to extend the life of your roof. Far too often, roofs are replaced before they need to be or before the homeowner is financially prepared for the investment. Our inspectors will provide a repair first approach to each issue of concern. They will always be fair and honest about the condition of your roof by reviewing with you any weak or failing areas that should be addressed. Furthermore, if a new roof is needed, we will provide an estimate for a full replacement or for budgeting for the future.

Weather Vane Roofing

4.6 ★★★★★ (47)

Roofing contractor

Thomas Gotts

★★★★★ 6 weeks ago

Chris and his team were very polite and responded quickly to my needs. I was having a hard time getting a response from other companies. I was so pleased I asked for a quote from them for new gutters and downspouts.

Russell Miyasato

★★★★★ 8 weeks ago

Weather Vane Roofing did an excellent job fixing my incorrectly flashed chimney and a leaking ridge cap. Ryan Petty was very prompt and courteous while helping us to understand what needed to be done to fix the issues we had with the roof, and to get the estimates written up and scheduled quickly. Ryan Bradford and his men were very friendly and professional while doing the work and they did a good job cleaning up the area after the work was completed. I would highly recommend them to anyone needing roofing or repairs on their home.

Thank you so much for your five star review!

Chris Bemke

★★★★★ 11 weeks ago

I called them to fix a leak in my roof around an exhaust pipe. Kris, came out took some pictures, told me what they would do, and wrote up a quote. After I agreed to the work to be done and signed the contract, I was put on the work schedule. I got some emails from the Crew Manager about the job. One day I saw a guy in a truck, when I was leaving. When I got back I had a ladder in my driveway, and no guy or truck. I was under the assumption they were going to call me and let me know they were coming out, and I didn't receive any call. So that was a little strange, but after a quick call to the Crew Manager he told me they was supposed to be there, and was probably out getting the materials needed for the job. Once the job was done, they sent before and after pictures of the job. I would work with them again.

Chris Walker

★★★★★ 18 weeks ago

Awesome Work! Very Professional! Ryan Petty went to battle for me against my insurance and was there for me every step of the way. They have my business for life.

Thank you so much for the 5 star review!

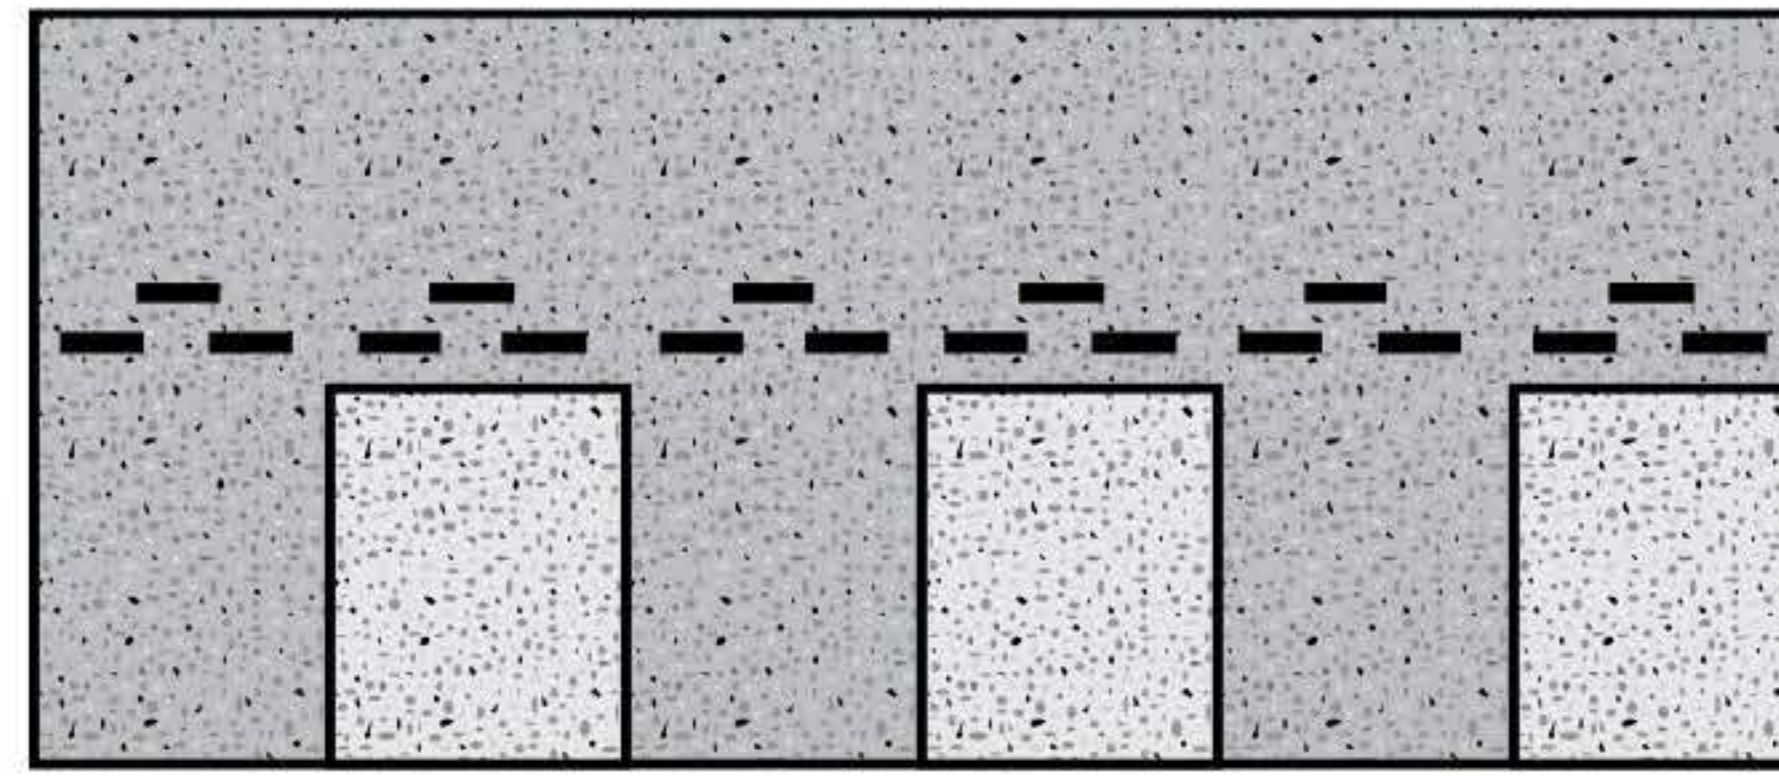

Donneke Brown

★★★★★ 24 weeks ago

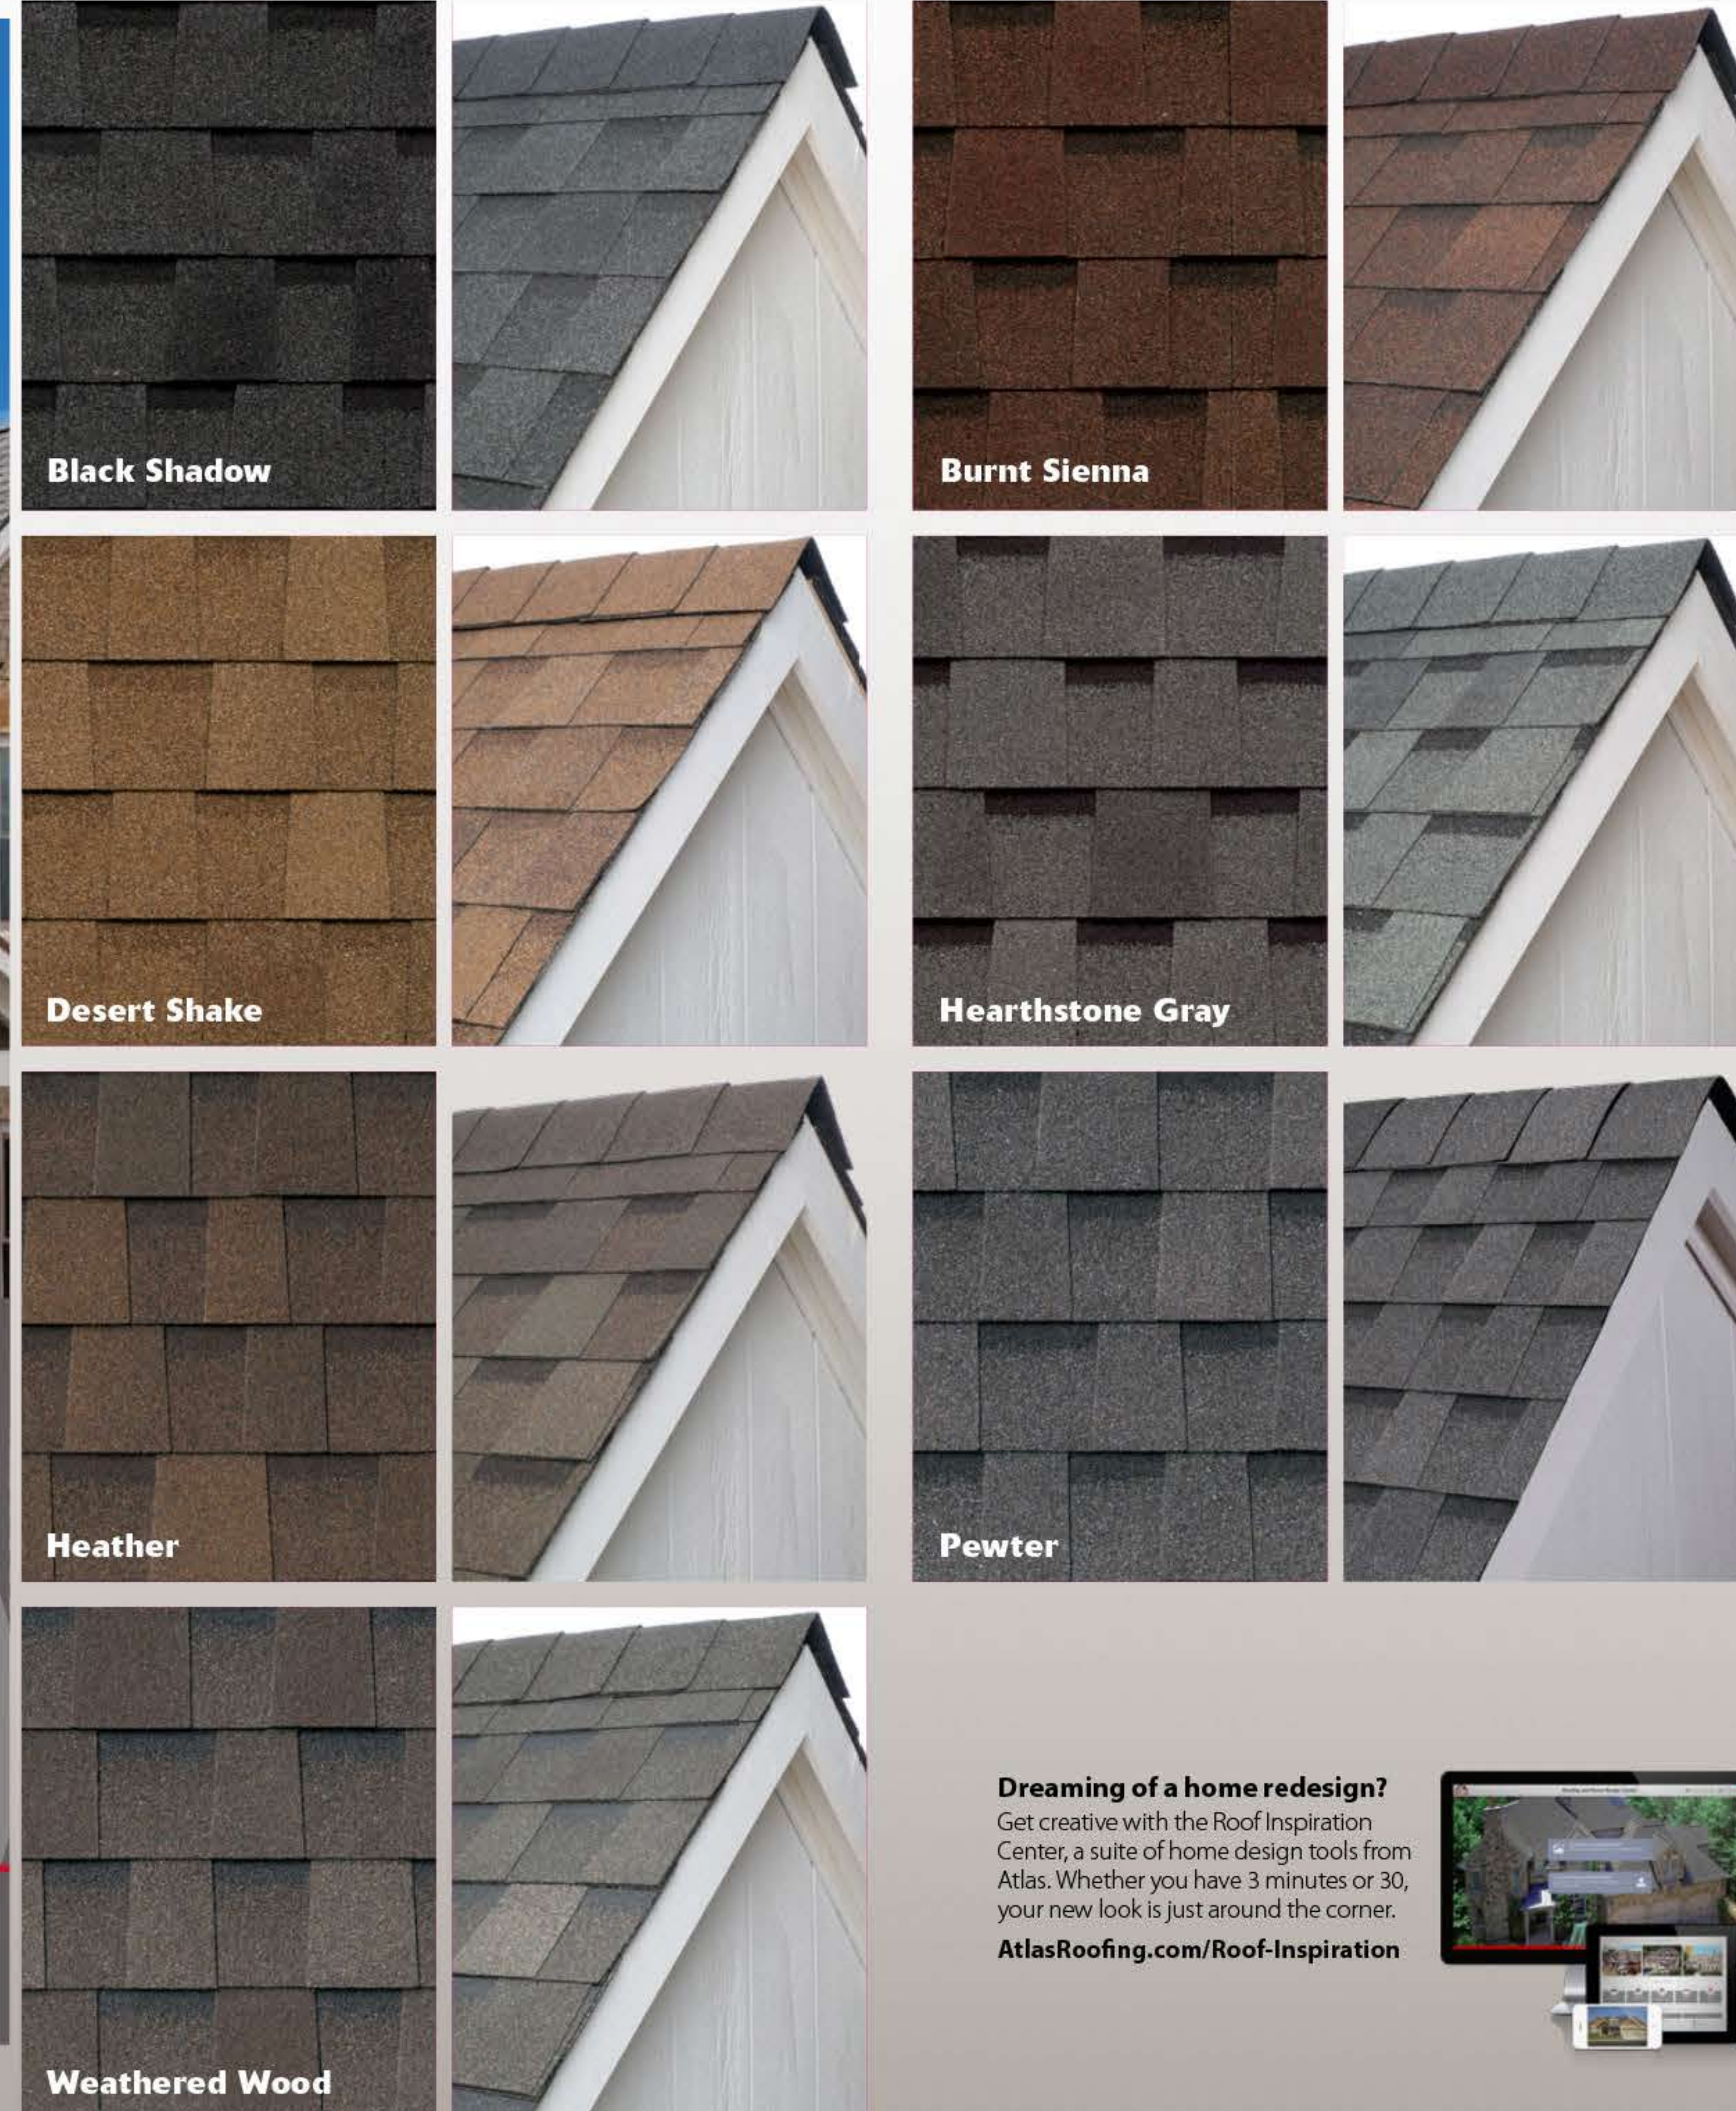

They came quick, did great work and it was worth it. I sleep well at night knowing my roof is now fixed right.

SAVING THE PLANET ONE ROOF AT A TIME

NEW ROOF

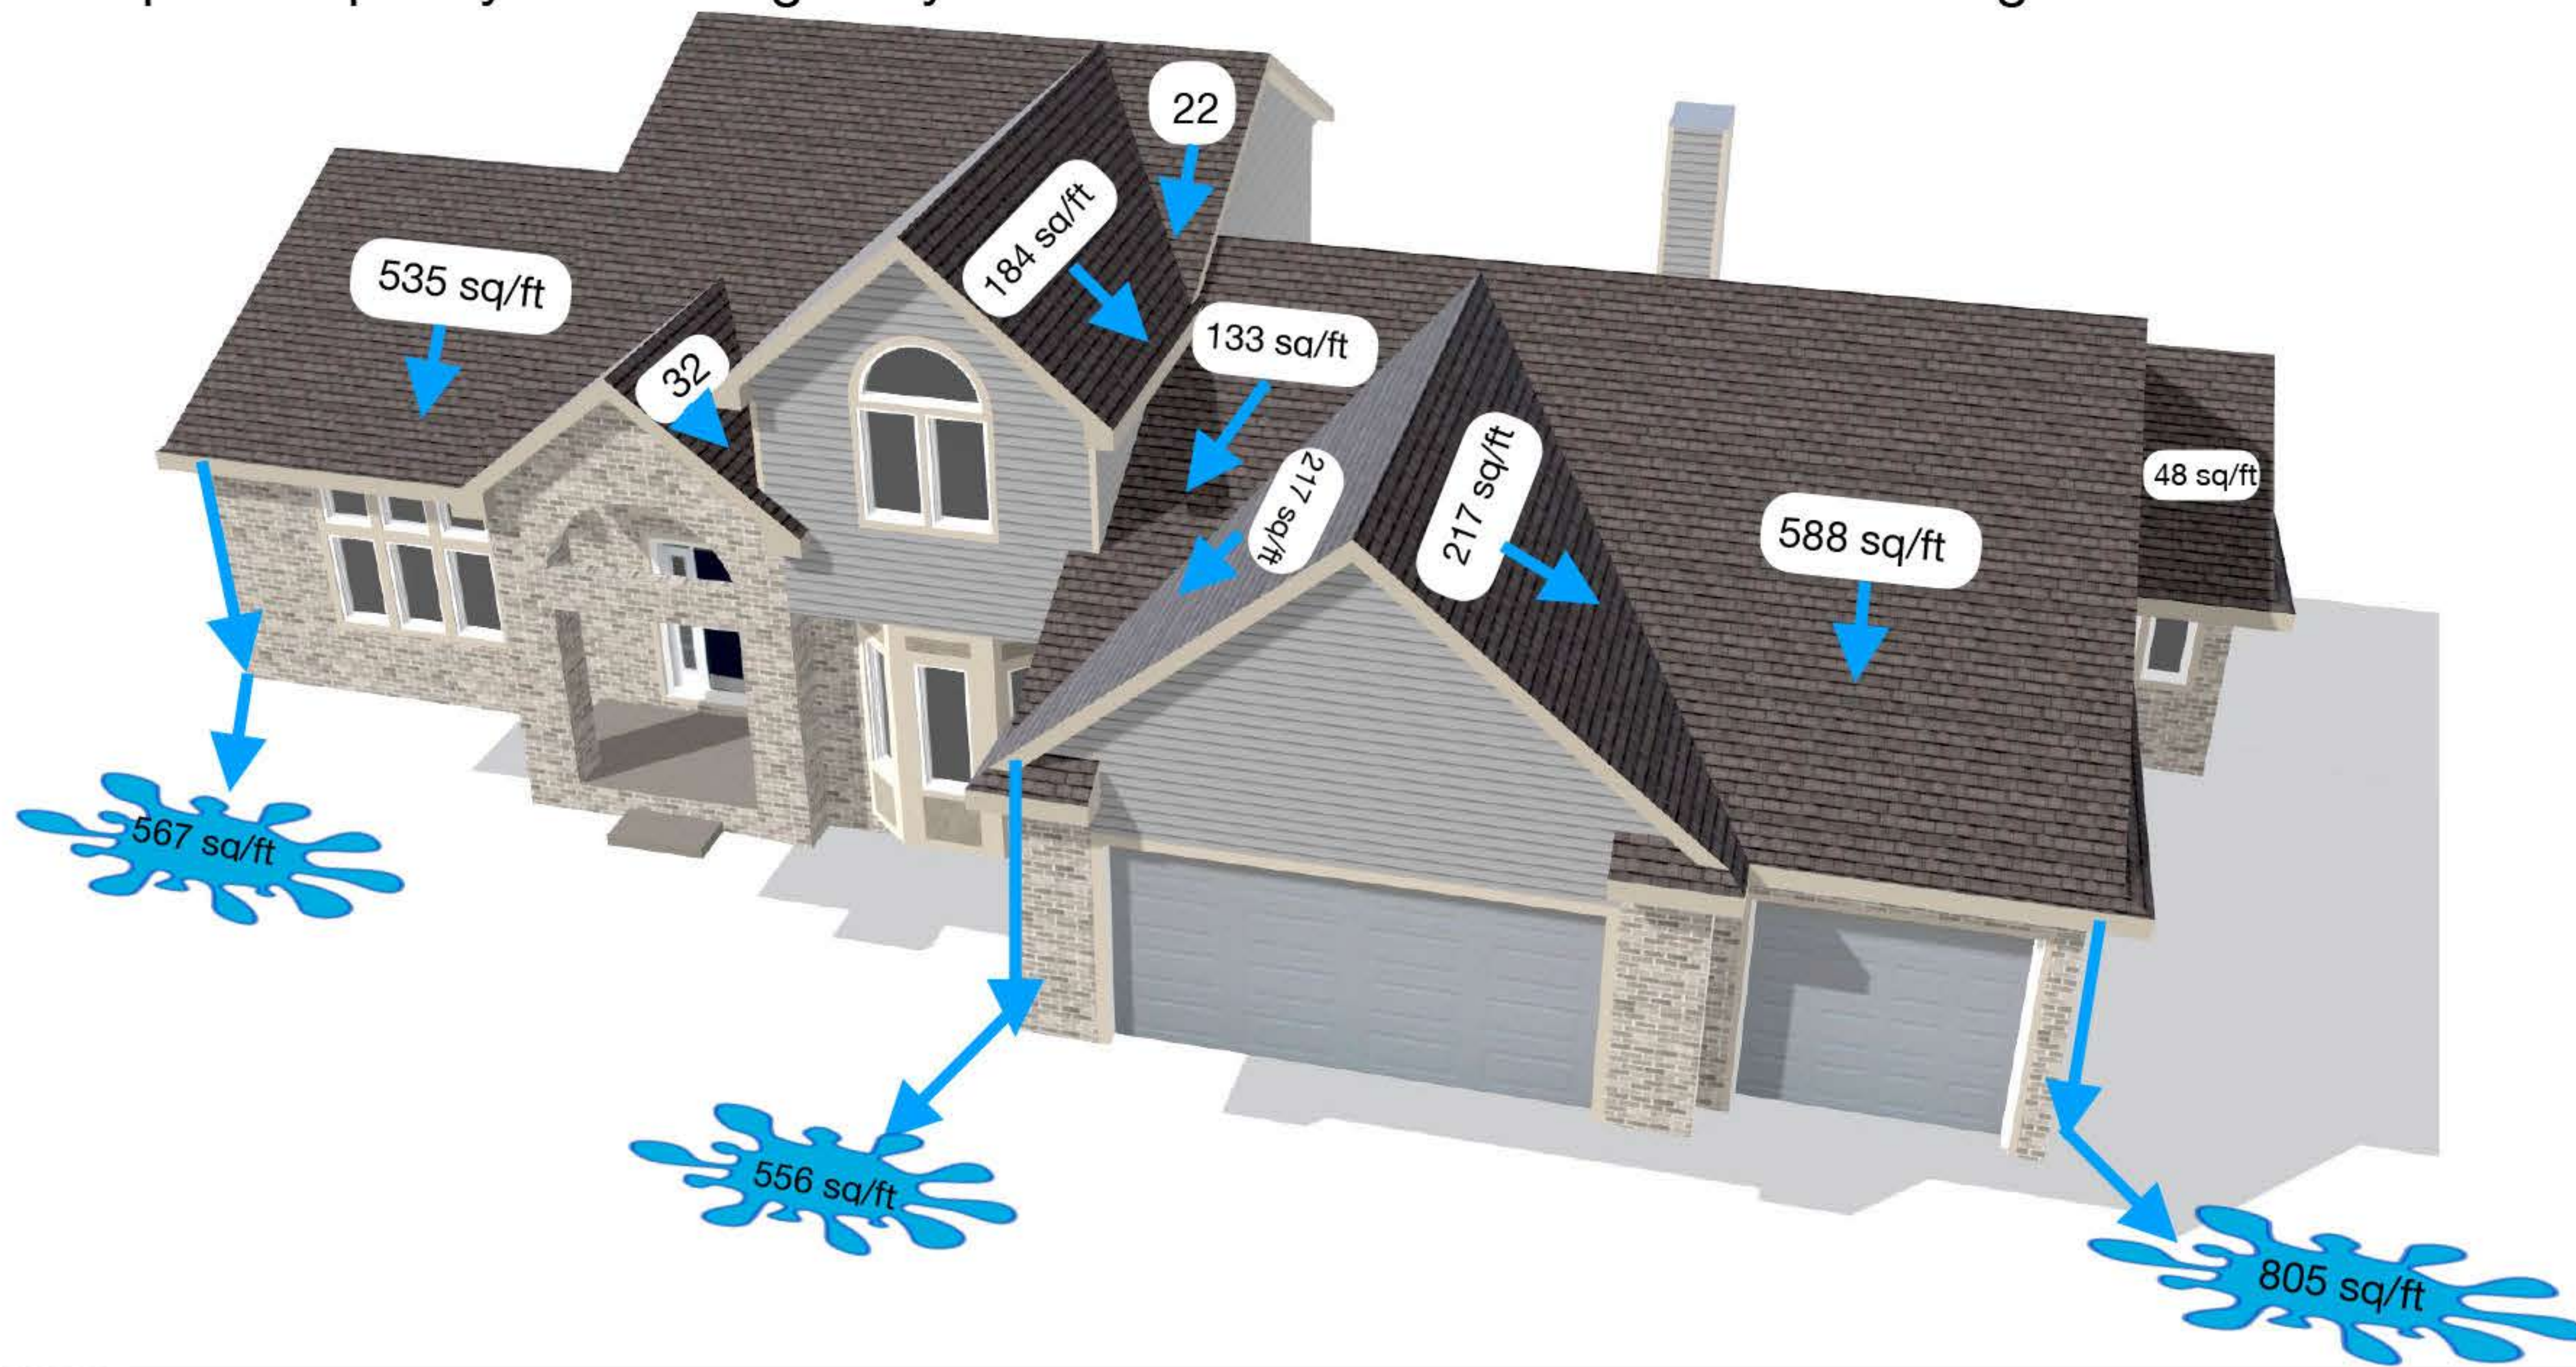

NO MESS[®]

Our RUBBER wheeled trailers will not damage your driveway, can be moved out of the way, and can be taken straight to the recycling yard!

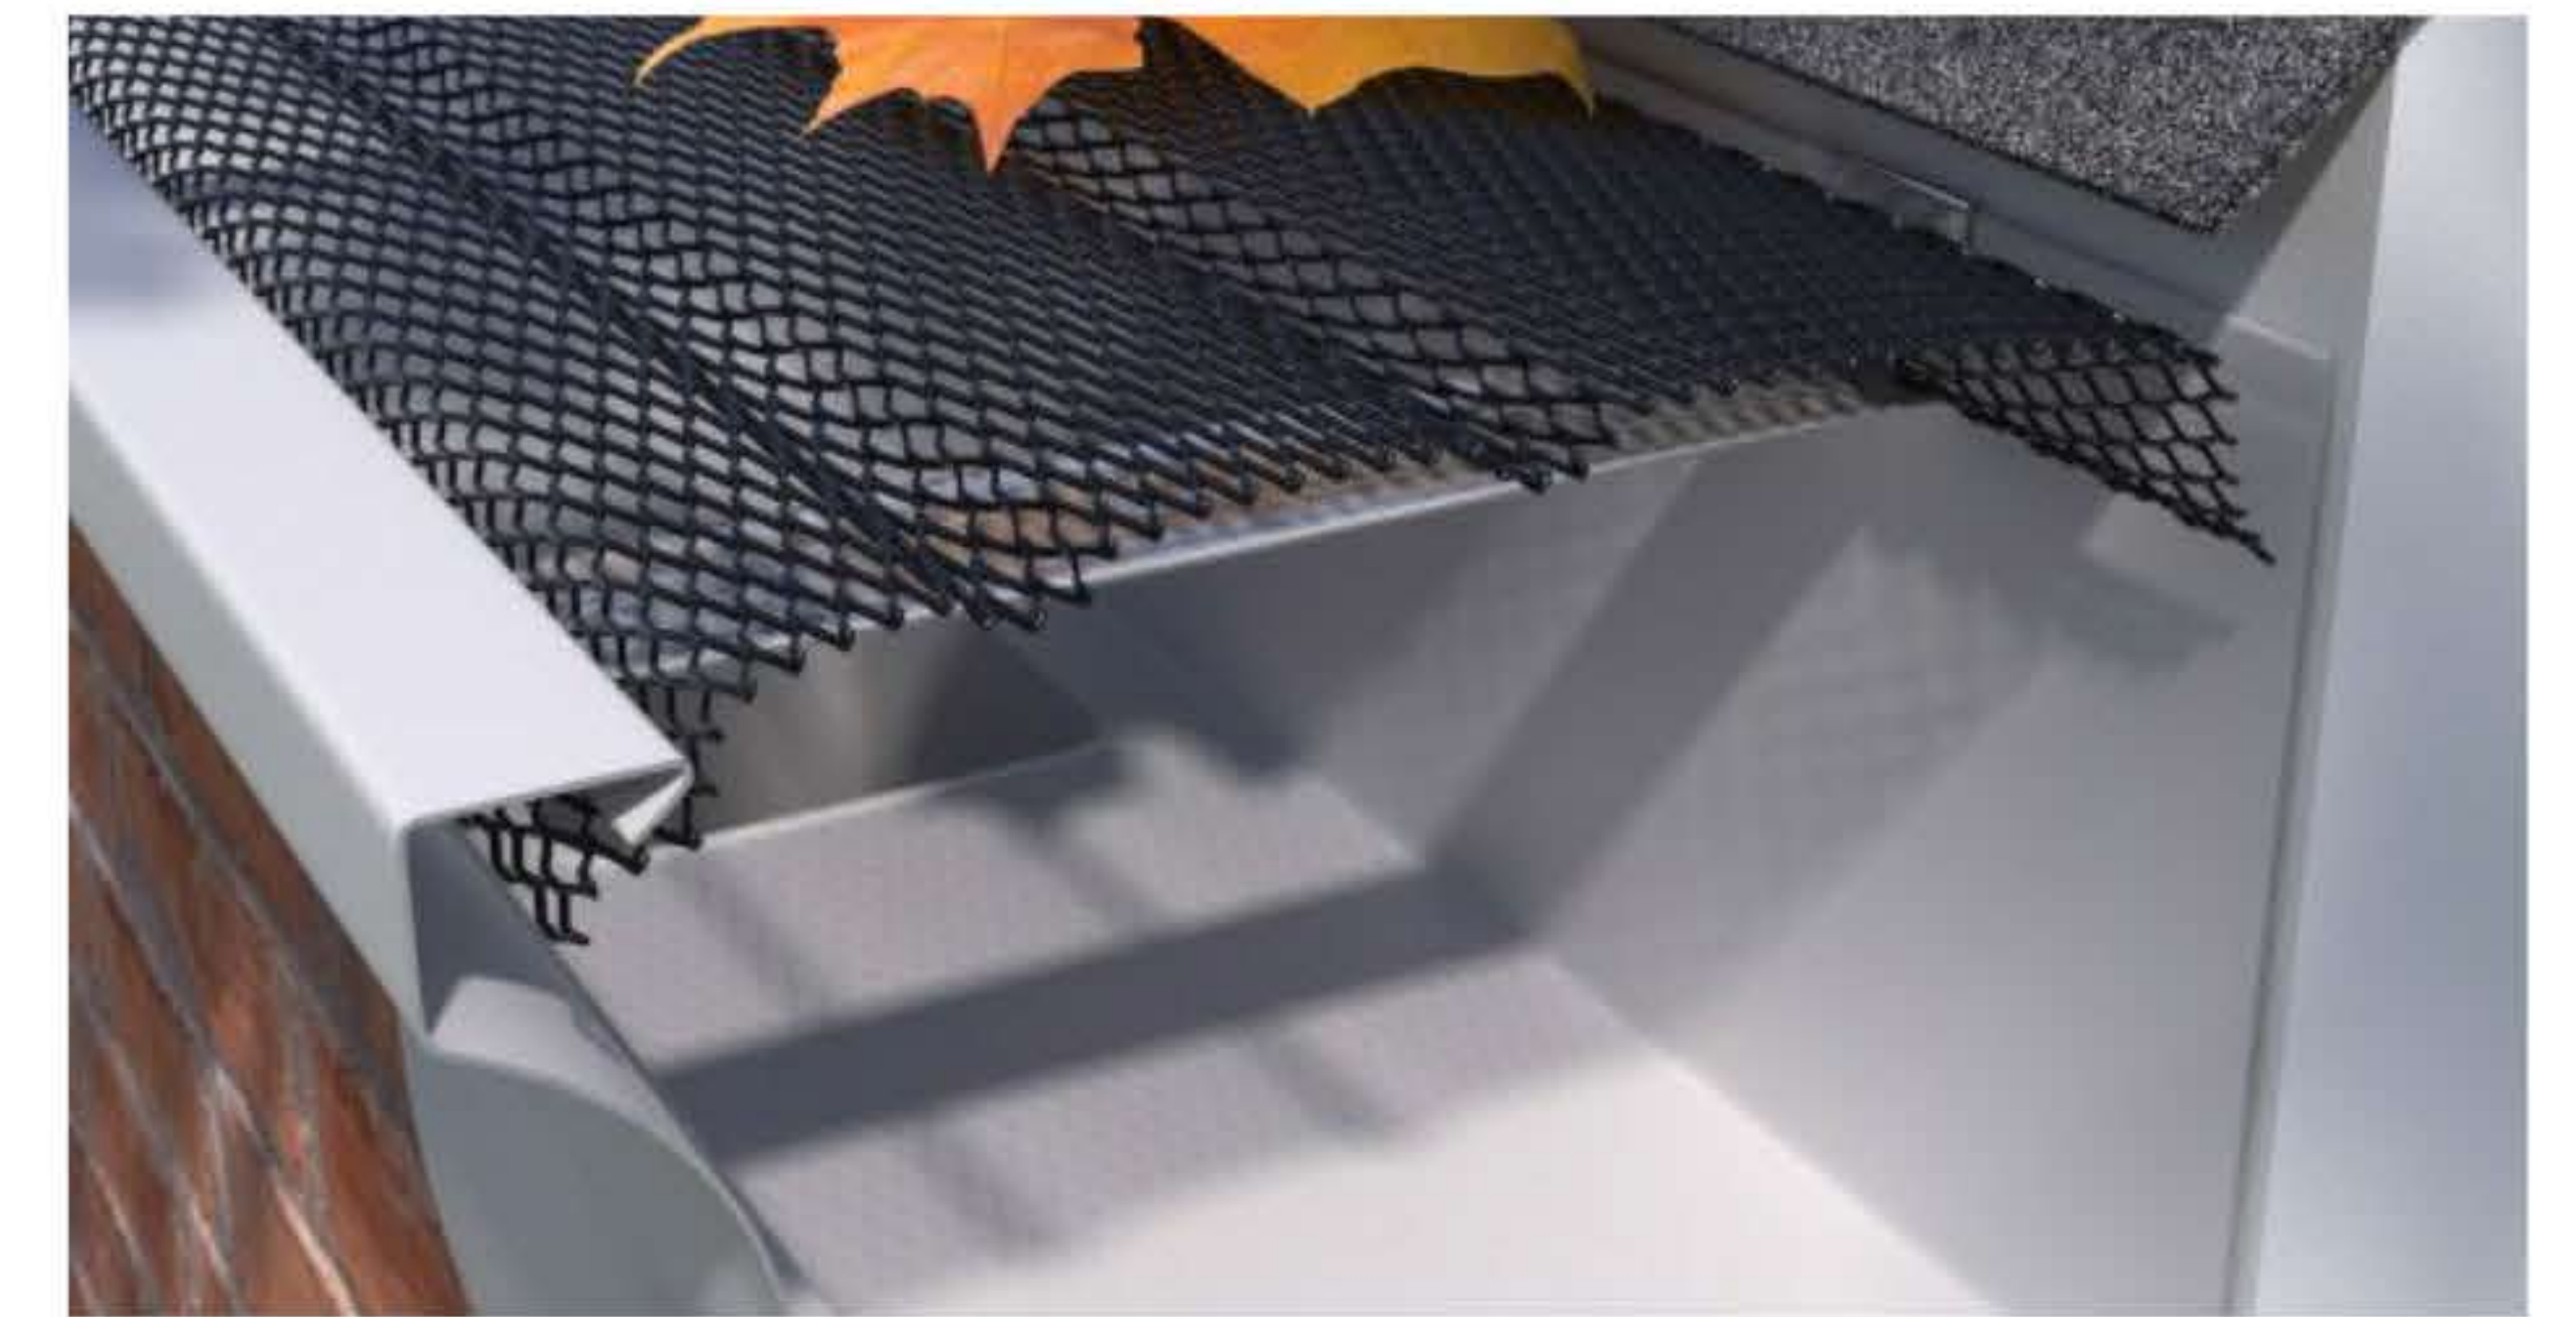

Gutters and Screens

How water is moved off of the roof and where we place the water is the most important feature of any gutter system. Each Weather Vane Gutter system is designed specifically for your property in mind. We take into account the volume of water going into each gutter and each downspout and recommend a proper gutter size and downspout capacity. This will greatly reduce the likelihood of overflow during even the worst rainstorms.

MICRO MESH

Large leaf and debris

Small debris / Pine Needles / Seed pods

Leaf Solution

Tiny Debris / Cottonwood / Pine Needles

Weather Vane Gutters are made from the thickest strongest aluminum available for a residential gutters system. The .032 thick gutter will better withstand the abuse that gutters go through from thermal expansion, ladders for routine maintenance, or painting or hanging seasonal decorations.

Weather Vane Gutters are coated on both sides. The outside is painted with Beautiful Duracoat XT-20 Baked-on Polyester over a prime coating and the inside is coated with a clear coating to reduce friction and help your gutter system stay flowing.

.032 gutter available in 20 standard colors, Other colors available in .027 outer. - Colors provided as an example only actual color should be verified.
